

re faa 2003 16282 airspace dkt 03 aea 06 class e airspace over philadelphia  
The FAA has been less than honest or fair with people who live on the ground  
near airports and who have planes flying over them day and night, very low, with  
very dangerous pilots who are unsupervised and who are polluting the air with  
extremely toxic jet and other fuel. the NJ Philadelphia air is some of the  
worst in the nation, yet I see no attempt by FAA to help this issue by  
addressing any of the issues such as noise, pollution and danger. This Class E  
airspace proposal by FAA should be opposed
